## 74LVQ245

Low Voltage Octal Bidirectional Transceiver with TRI-STATE ${ }^{\circledR}$ Inputs/Outputs

## General Description

The LVQ245 contains eight non-inverting bidirectional buffers with TRI-STATE outputs and is intended for bus-oriented applications. Current sinking capability is 12 mA at both the A and B ports. The Transmit/Receive (T/R) input determines the direction of data flow through the bidirectional transceiver. Transmit (active-HIGH) enables data from A ports to B ports; Receive (active-LOW) enables data from B ports to A ports. The Output Enable input, when HIGH, disables both A and B ports by placing them in a HIGH Z condition.

## Features

- Ideal for low power/low noise 3.3V applications
- Implements patented Quiet Series EMI reduction circuitry
- Available in SOIC JEDEC, SOIC EIAJ and QSOP packages
- Guaranteed simultaneous switching noise level and dynamic threshold performance
- Improved latch-up immunity
(1 Guaranteed incident wave switching into $75 \Omega$
- 4 kV minimum ESD immunity
- MIL-STD-883 54 ACQ products are available for Military/Aerospace applications

Ordering Code: See Section 11

Note: The "Absolute Maximum Ratings" are those values beyond which the safety of the device cannot be guaranteed. The device should not be operated at these limits. The parametric values defined in the "Electrical Characteristics" table are not guaranteed at the absolute maximum raings. The "Recommended Operating Conditions" table will define the conditions for actual device operation.

## Recommended Operating Conditions

| Supply Voltage $\left(V_{C C}\right)$ |  |
| :--- | ---: |
| LVQ | 2.0 V to 3.6 V |
| Input Voltage $\left(V_{1}\right)$ | 0 V to $V_{C C}$ |
| Output Voltage $\left(V_{0}\right)$ | 0 V to $\mathrm{V}_{\mathrm{CC}}$ |
| Operating Temperature $\left(\mathrm{T}_{\mathrm{A}}\right)$ |  |
| 74 LVQ | $-40^{\circ} \mathrm{C}$ to $+85^{\circ} \mathrm{C}$ |
| Minimum Input Edge Rate $(\Delta \mathrm{V} / \Delta \mathrm{t})$ |  |
| $V_{\text {IN }}$ from 0.8 V to 2.0 V |  |
| $V_{C C} @ 3.0 \mathrm{~V}$ | $125 \mathrm{mV} / \mathrm{ns}$ |
