9348

9348 12-Input Parity Checker/Generator

**N** *National Semiconductor*

June 1989

9348
12-Input Parity Checker/Generator

General Description
The 9348 is a 12-input parity checker/generator generating odd and even parity outputs. It can be used in high speed error detection applications.

V_{CC} = Pin 16
GND = Pin 8

Pin Names	Description
I0–I11	Parity Inputs
PO	Odd Parity Output
PE	Even Parity Output

Absolute Maximum Ratings

Supply Voltage	7V
Input Voltage	5.5V
Operating Free Air Temperature Range	
Military	−55°C to +125°C
Storage Temperature Range	−65°C to +150°C

Note: *The ''Absolute Maximum Ratings'' are those values beyond which the safety of the device cannot be guaranteed. The device should not be operated at these limits. The parametric values defined in the ''Electrical Characteristics'' table are not guaranteed at the absolute maximum ratings. The ''Recommended Operating Conditions'' table will define the conditions for actual device operation.*

Recommended Operating Conditions

| Symbol | Parameter | 9348 | | | Units |
		Min	Nom	Max	
V_{CC}	Supply Voltage	4.5	5	5.5	V
V_{IH}	High Level Input Voltage	2			V
V_{IL}	Low Level Input Voltage			0.8	V
I_{OH}	High Level Output Current			−0.8	mA
I_{OL}	Low Level Output Current			16	mA
T_A	Free Air Operating Temperature	−55		125	°C

Electrical Characteristics

Over recommended operating free air temperature range (unless otherwise noted)

Symbol	Parameter	Conditions	Min	Typ (Note 1)	Max	Units
V_I	Input Clamp Voltage	V_{CC} = Min, I_I = −12 mA			−1.5	V
V_{OH}	High Level Output Voltage	V_{CC} = Min, I_{OH} = Max, V_{IL} = Max	2.4			V
V_{OL}	Low Level Output Voltage	V_{CC} = Min, I_{OL} = Max, V_{IH} = Min			0.4	V
I_I	Input Current @ Max Input Voltage	V_{CC} = Max, V_I = 5.5V			1	mA
I_{IH}	High Level Input Current	V_{CC} = Max, V_I = 2.4V			80	μA
I_{IL}	Low Level Input Current	V_{CC} = Max, V_I = 0.4V			−3.2	mA
I_{OS}	Short Circuit Output Current	V_{CC} = Max (Note 2)	−20		−70	mA
I_{CC}	Supply Current	V_{CC} = Max			82	mA

Note 1: All typicals are at V_{CC} = 5V, T_A = 25°C.
Note 2: Not more than one output should be shorted at a time.

Switching Characteristics

V_{CC} = +5.0V, T_A = +25°C (See Section 1 for waveforms and load configuration)

| Symbol | Parameter | Conditions | C_L = 15 pF R_L = 400Ω | | Units |
			Min	Max	
t_{PLH} t_{PHL}	Propagation Delay I4 to PO	I2, I3, I7, I8 = GND; Other Inputs (except I4) HIGH		46 42	ns
t_{PLH} t_{PHL}	Propagation Delay I4 to PE	I2, I3, I7, I8 = GND; Other Inputs (except I4) HIGH		51 48	ns
t_{PLH}	Propagation Delay I3 to PO	I7 = HIGH; Other Inputs (except I3) = GND		27	ns
t_{PHL}	Propagation Delay I4 to PO	All Inputs (except I4) = GND		25	ns

2

Functional Description

The 9348 is a 12-input parity generator. It provides odd and even parity for up to 12 data bits. The Even Parity output (PE) will be HIGH if an even number of logic ones are present on the inputs. The Odd Parity output (PO) will be HIGH if an odd number of logic ones are present on the inputs. The logic equations for the outputs are shown below.

$$PO = I0 \oplus I1 \oplus I2 \oplus I3 \oplus I4 \oplus I5 \oplus I6 \oplus I7 \oplus I8 \oplus I9 \oplus I10 \oplus I11$$
$$PE = \overline{I0 \oplus I1 \oplus I2 \oplus I3 \oplus I4 \oplus I5 \oplus I6 \oplus I7 \oplus I8 \oplus I9 \oplus I10 \oplus I11}$$

Note: Less through delay is encountered from the I0, I1, I2 and I3 inputs than I4 thru I11 inputs. Therefore, if some signals are slower than others, the slower signals should be applied to these four inputs for maximum speed.

Truth Table

| Inputs		Outputs	
I0–I11		PO	PE
All Twelve	Inputs LOW	L	H
Any One	Inputs HIGH	H	L
Any Two	Inputs HIGH	L	H
Any Three	Inputs HIGH	H	L
Any Four	Inputs HIGH	L	H
Any Five	Inputs HIGH	H	L
Any Six	Inputs HIGH	L	H
Any Seven	Inputs HIGH	H	L
Any Eight	Inputs HIGH	L	H
Any Nine	Inputs HIGH	H	L
Any Ten	Inputs HIGH	L	H
Any Eleven	Inputs HIGH	H	L
Any Twelve	Inputs HIGH	L	H

H = HIGH Voltage Level
L = LOW Voltage Level

LIFE SUPPORT POLICY

NATIONAL'S PRODUCTS ARE NOT AUTHORIZED FOR USE AS CRITICAL COMPONENTS IN LIFE SUPPORT DEVICES OR SYSTEMS WITHOUT THE EXPRESS WRITTEN APPROVAL OF THE PRESIDENT OF NATIONAL SEMICONDUCTOR CORPORATION. As used herein:

1. Life support devices or systems are devices or systems which, (a) are intended for surgical implant into the body, or (b) support or sustain life, and whose failure to perform, when properly used in accordance with instructions for use provided in the labeling, can be reasonably expected to result in a significant injury to the user.

2. A critical component is any component of a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or system, or to affect its safety or effectiveness.

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice. Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

TI assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using TI components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any TI patent right, copyright, mask work right, or other TI intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information published by TI regarding third-party products or services does not constitute a license from TI to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. Reproduction of this information with alteration is an unfair and deceptive business practice. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and any implied warranties for the associated TI product or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

TI products are not authorized for use in safety-critical applications (such as life support) where a failure of the TI product would reasonably be expected to cause severe personal injury or death, unless officers of the parties have executed an agreement specifically governing such use. Buyers represent that they have all necessary expertise in the safety and regulatory ramifications of their applications, and acknowledge and agree that they are solely responsible for all legal, regulatory and safety-related requirements concerning their products and any use of TI products in such safety-critical applications, notwithstanding any applications-related information or support that may be provided by TI. Further, Buyers must fully indemnify TI and its representatives against any damages arising out of the use of TI products in such safety-critical applications.

TI products are neither designed nor intended for use in military/aerospace applications or environments unless the TI products are specifically designated by TI as military-grade or "enhanced plastic." Only products designated by TI as military-grade meet military specifications. Buyers acknowledge and agree that any such use of TI products which TI has not designated as military-grade is solely at the Buyer's risk, and that they are solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI products are neither designed nor intended for use in automotive applications or environments unless the specific TI products are designated by TI as compliant with ISO/TS 16949 requirements. Buyers acknowledge and agree that, if they use any non-designated products in automotive applications, TI will not be responsible for any failure to meet such requirements.
