

DH0035/DH0035C PIN diode driver

general description

The DH0035 is a high speed switch driver specification designed to supply the high peak currents needed for diode switching. Features include:

- High current drive lamp peak
- High voltage swing 12-30V

- Low standby power typ 30 mW
- Very fast rise and fall times typ.

These features make the NH0035 ideal for driving PIN diode RF switches.
